

### INTRODUCTION

Prime Swivel Impact Extension Sockets have a swivel joint as a built in feature. These are useful for tightening of nuts located at difficult angular positions which cannot be reached with standard sockets. These are available in 3/8" and 1/2" Square Drives to cover nut sizes 6 mm to 24 mm. Non standard sizes can be manufactured on request.

PRIME Swivel Impact Extension Sockets are also available for bolt clearance requirements.

3/8 " Square Drive
